Managing

INJURY

Risks

IF YOU COULD PUT YOUR FINGER ON THE SOLUTION TO INJURED WORKERS, STAFF SHORTAGES, AND HOW TO AVOID THE STRESS OF ANGRY CUSTOMERS...

WOULD YOU LIKE TO KNOW MORE?

COMMUNICATE FROM ANYWHERE WITH THE TELEMEDICINE ADVANTAGE

No matter what your staff is doing in the injury prevention or treatment process - from education through treatment - the key to success is following through with the program in a timely fashion for the best out-comes. Telemedicine makes it possible to work with your provider from anywhere, whether at work, at home, or on the road.

ACCELERATE RETURN TO WORK

When injuries do occur, having the key resources can make a tremendous difference in work absences. Reduce the time in getting workers back in action by using proven techniques.

- ⇒ Conduct employee assessments onsite or online
- ⇒ Evaluate injuries onsite or via telemedicine
- ⇒ Take advantage of Priority Scheduling for treatment

PREVENT THROUGH EDUCATION AND EXERCISE

Prevention of injury starts with taking action before accident situations arise. Educate your staff so they are aware by providing:

- ⇒ Education seminars & onsite training (i.e., business-specific ergonomics and body mechanics)
- ⇒ Injury screening onsite or remotely with telemedicine
- ⇒ Exercise classes tailored to the work environment

SAVE:

TIME. MONEY. CUSTOMERS.

As with all businesses, your company is at risk when workers are injured. Injuries cause all sorts of problems from absences to staff shortages, loss of customers to significant business stress.

As a manager in your company, you have the opportunity to manage injury risk if you have the right tools. The solution consists of taking advantage of prevention tools and options for accelerating return to work for workers when injuries occur. **YOUR SUCCESS DEPENDS ON IT!**
